

Sani-Harvest

Field Harvesting and Packing System for fresh, perishable, produce

The Sani-Harvest was designed with food safety and efficient packing of produce as some of its top features. All surfaces that the produce contacts are made of stainless steel. This machine can be used efficiently to harvest, weigh, box and load many types of produce such as cabbage, lettuce, leafy greens, and many other types of produce. The Sani-Harvest features a tinted polycarbonate canopy to keep direct sunlight off the workers and the produce.
